

CivicEye AI

Smart AI Solution for a Cleaner Sri Lanka LK

AI-powered public issue reporting and management platform

 AI Analysis

 Smart Location

 Authority Workflow

Young Computer Scientist (YCS) 2026

LK AI Innovation Project

The Public Issue Challenge

Public problems need a faster and more organized way to reach the right authority.

Difficult Reporting

Citizens may struggle to report public problems efficiently.

Slow Follow-up

Reports can be difficult to monitor after submission.

Repeated Complaints

Similar complaints may be submitted multiple times.

Wrong Routing

A report may need to reach the correct local authority.

Introducing CivicEye AI

CIVICEYE AI • 3/7

One platform connecting citizens, AI-assisted analysis and authorities.

AI Issue Detection

Identify and categorize reported issues.

Smart Location

Capture where the issue was reported.

Duplicate Detection

Identify similar reports.

Priority Classification

Highlight issues needing faster attention.

Authority Recommendation

Suggest the relevant authority.

Status Tracking

Monitor complaint progress.

Resolution Verification

Allow citizens to verify resolution.

Multilingual Voice

Support English, Tamil and Sinhala when available.

How CivicEye AI Works

CIVICEYE AI • 4/7

A simple digital workflow turns a citizen report into a trackable public issue.

01

REPORT

Citizen submits image, description and location.

02

AI ANALYSIS

System analyses and categorizes the issue.

03

PRIORITIZE

Priority and duplicate information are generated.

04

AUTHORITY

Relevant authority can review the report.

05

MONITOR

Status changes can be tracked by citizens.

06

RESOLVE

Citizen can verify the reported issue.

Technology & System Architecture

CivicEye AI combines a web frontend with a Node.js backend and API-based communication.

FRONTEND

HTML
CSS
JavaScript
Responsive Web
Interface

BACKEND

Node.js
Express.js
Multer
REST APIs
CORS + dotenv

DEPLOYMENT

Web Frontend
+
Railway Backend
+
API Communication

Citizen → Frontend → REST API → Backend → Admin

TESTED

- ✓ Image upload & report submission
- ✓ AI processing result display
- ✓ Citizen report tracking
- ✓ Admin dashboard workflow
- ✓ Status update APIs
- ✓ Report retrieval & management
- ✓ Railway backend connection

FUTURE IMPROVEMENTS

-  More advanced AI models
-  Persistent production database
-  Improved multilingual voice input
-  Advanced analytics
-  Real-time notifications
-  Wider community deployment

Building smarter communities through AI and digital reporting LK

Report • Analyse • Prioritize • Connect • Resolve
